

Fulton Mothers Now Treat Children's Colds Externally

They Find Vap-O-Rub Better Than Internal Medicines for Croup and Cold Troubles.

Mrs. J. S. Pugh, 510 Market St., and Mrs. Mary Bolton, 105 Ravine St., both of Fulton, Mo., have found, in common with many other Missouri mothers, that it is no longer necessary to dose children with internal medicines for cold troubles. In the South Vick's Vap-O-Rub is the standard remedy for these troubles, but it was only last winter that it was introduced here. Vap-O-Rub was discovered by a North Carolina druggist. He found how to combine Menthol and Camphor with the volatile oils of Thyme, Eucalyptus, Cubeb and Juniper, in salve form, so that when applied to the body, the ingredients are vaporized by the body heat.

These vapors are inhaled with each breath, through the air passages, to the lungs, carrying the medication direct to the affected parts, and, in addition, Vick's is absorbed through the skin, taking out the tightness and

An Ohio Case

Mrs. J. Martin, De-fiance St., Stryker, O., says: "I was an awful sufferer from kidney trouble brought on by overwork. Sometimes I could hardly walk on account of the sharp pains in my back. My feet swelled badly. My head ached and my nerves were a wreck. Doctors gave me only temporary relief. Finally, I used Doan's Kidney Pills and they cured me so completely that I have enjoyed good health ever since."

ON THE DOWNGRADE.

For a decade while prohibition area was steadily spreading, the statistics of the federal government showed the manufacturers of intoxicants paying taxes on a constantly enlarging quantity of their products. And it surely did make a hard nut for a prohibitionist to crack—to explain the reason why the liquor trade got better while saloons were all the time growing fewer.—The Continent.

Not such a hard nut when it is known that all liquor on which the government tax has been paid is officially reported as "consumed," and that during the decade referred to large quantities were forced out of the bonded warehouses by the time limit and stored in private warehouses awaiting a constantly decreasing demand.

"But," continues the Continent, with pertinent emphasis, "whatever was the real secret of that paradox, the necessity of explaining it has now quite gone by. It is a fact no more. The business of brewing and distilling is at last on a toboggan slide which nobody can deny. The report of the commissioner of internal revenue for 1915, just issued, shows a decline in both beer making and whisky making, which demonstrates that prohibition is now prohibiting with a vengeance plainly marking the beginning of the end. The 1914 report already showed some shortage in the whisky business; from the year before there was a decline of 16,000,000 gallons. But the new report proves how falling bodies are accelerated as they fall, for the decline in the year just past is 41,000,000 gallons—from 181,000,000 to 140,000,000.

"Even more significant is the record of item that within the year 1915 distilleries quit business out of 743 such institutions in the United States. And meanwhile the quantity of beer made in this country decreased from 66,000,000 barrels to 59,000,000. This is, for the brewers, their first setback, but it furnishes sufficient notice that they are ticketed for the same downgrade that their distilling brethren are embarked on. The cry is 'Going down!' for the whole crew of 'em."

ALCOHOL AND PNEUMONIA.

Dr. W. A. Evans conducts a department, "How to Keep Well," in Chicago Daily Tribune. Giving advice recently concerning measures for the prevention of colds and pneumonia he said:

"Now is the time to get on the water wagon and to stay there. Whisky and every other form of alcoholic drink is a pneumonia begueter. Alcohol lowers the fighting defenses of the human body against all forms of disease, but especially against pneumonia. This has been proved by careful scientific tests. It is a universally recognized clinical fact. This is one of the points on which the laboratory men and the practicing physicians are in full accord. If an ordinary man gets pneumonia chances are three to one that he will get well. Whisky drinkers who get pneumonia do not have a three-to-one chance for life."

RUSSIA DRY FOR ALL TIME.

In a debate before the Russian duma the minister of finance, M. Bark, made this significant declaration:

"I deem it necessary to declare categorically that all suspicions ascribing to the government any intention of resuming the state sale of liquors are unfounded. I declare categorically that the government will encourage temperance after the war, also, and that any return to the old state of affairs is impossible. Proof of this intention is the fact that the government is now engaged in drawing up a bill, on lines suggested by forty-five members of the duma, for the maintenance of temperance for all time. This bill already has met with the sympathy of the entire council of ministers, and vodka, in accordance with the czar's wish, as expressed to me, will be totally prohibited forever."

BRINGS MORBID-CHANGES.

That indulgence in intoxicating beverages, even to a degree short of the conditions of intemperance and inebriety, is calculated to bring about morbid changes in the human body, and to lead to mental and physical deterioration, is a fact which is only too patent to every practitioner of medicine.—The Lancet.

EFFECT IN NEW DRY STATES.

While some of the merchants in the newly dry states are loath to admit as yet that increased business is due to prohibition all agree that at least the expected calamities have not materialized, unless the loss in police and court business can be considered a calamity.

New Strength for Lame Backs and Worn-out Conditions

Dear Mr. Editor: I suffered from lame back and a tired, worn-out feeling. Was unable to stand erect and scarcely able to get around. It would usually come on at first with crick in small of my back. I took Anuric Tablets and my back commenced to get better. I did not have to walk doubled over as I did before using the "Anuric." It is the best remedy I have ever taken for what it is intended to relieve.
